Internships

Intern at COMSATS University, Park Road, Chak Shahzad, Islamabad, Pakistan: *April-May, 2008*

Internship report titled "Familiarizing with and using LINUX and PERL in Bioinformatics applications" completed at the Department of Biosciences at COMSATS University Islamabad, Pakistan. It was a great experience in which the installation and handling of LINUX and PERL were learned.
Duties : Web Application for DNA Analysis by Using Linux (OS) and Perl Routines. My task was to develop a web application for DNA analysis by using Linux as an operating system and PERL as a scripting language. I have to complete the project during my internship period which was done successfully.

One Year Internship at National Institute of Health (NIH), Islamabad,Pakistan:

NIH is one of the most prestigious institutions of the country involved in multi-disciplinary public health-related activities. I had working experience at NIH Islamabad in Biological Production Division. BPD is the sole producer of life-saving vaccines and anti-sera for immunization and therapeutic use to control the communicable diseases in the country. The vaccines produced here are the major tools used for the prevention of communicable diseases such as Cholera, Typhoid, Measles, Rabies, and Tetanus, etc. During my internship at the NIH, I was able to learn molecular biology techniques like PCR, DNA Extraction, etc.

Information Management and Mine Action Program (iMMAP)
iMMAP, a Washington, D.C-based international NGO, is a pioneering humanitarian organization that for more than a decade has led the way in the effective use of information management practices and principles in service to the world's most vulnerable populations. Primarily working in area of Communication, Media, Information management and project management for development and emergency programs. I have been involved in monitoring and evaluation, need assessment, donor reporting and reporting to stakeholders. I was also involved in cluster coordination activities, including joint assessment planning, need analysis, cluster response planning and cluster preparedness for emergencies.
